

# Gateway Product Update (IPG)

---

April 2022

This Product Update is meant to inform employees of Fiserv and its alliance partners about new functionality on our Gateway (“IPG”).

It is not meant to communicate the market readiness of new features for a specific sales channel which will be announced by the local business or alliance partner once the feature is prepared for sale in this particular distribution system.

# Managed Redirect: 3-D Secure

We have extended our Managed Redirect feature with the new *'redirectAttributes'* object to accommodate 3-D Secure flows, what can significantly reduce the implementation effort for our merchants integrated via REST API.

An API Response includes the parameter *'redirectURL'* what generates a hosted payment page for the cardholders to complete their payment.

The solution is compatible with all available 3-D Secure protocol versions and browser based transaction flows.

# EMV 3-D Secure: Browser Parameters

For our clients who are able to collect their customers' browser information themselves, we have added new optional request parameters to Gateway's REST and SOAP APIs.

```
"authenticationRequest":{
  "authenticationType":"Secure3DAuthenticationRequest",
  "termURL":"https://test.ipg-online.com/webshop/simulator/secure3d/return",
  "methodNotificationURL":"https://webshop/notify",
  "challengeIndicator":"01",
  "cardHolderBrowserParams":{
    "browserAcceptHeaders":"Accept: text/html, application/xhtml+xml,
      application/xml;q=0.9,image/webp, */*;q=0.8",
    "browserIP":"85.117.56.12",
    "browserLanguage":"es-419",
    "browserColorDepth":"32",
    "browserScreenHeight":"1080",
    "browserScreenWidth":"1920",
    "browserTimeZone":"-300",
    "browserUserAgent":"Lynx/2.8.4rel.1 libwww-FM/2.14 SSL-MM/1.4.1 OpenSSL/0.9.6c"
  }
}
```

```
<v1:CardHolderBrowserParameters>
  <v1:BrowserAcceptHeader>Accept: text/html, application/xhtml+xml,
    application/xml;q=0.9,image/webp, */*;q=0.8</v1:BrowserAcceptHeader>
  <v1:BrowserIP>85.117.56.12</v1:BrowserIP>
  <v1:BrowserLanguage>es-419</v1:BrowserLanguage>
  <v1:BrowserColorDepth>32</v1:BrowserColorDepth>
  <v1:BrowserScreenHeight>1080</v1:BrowserScreenHeight>
  <v1:BrowserScreenWidth>1920</v1:BrowserScreenWidth>
  <v1:BrowserTimeZone>-300</v1:BrowserTimeZone>
  <v1:BrowserUserAgent>Lynx/2.8.4rel.1 libwww-FM/2.14 SSL-M/1.4.1
    OpenSSL/0.9.6c</v1:BrowserUserAgent>
</v1:CardHolderBrowserParameters>
```

Browser parameters included in the authentication request help to provide additional information to the issuer and may increase the probability of a frictionless flow.

Merchants processing 3-D Secure via our Hosted Payment Pages solution are not required to change their implementation, as the Gateway collects and process cardholder browser parameters on their behalf.

# New Payment Method: Bitpay

To further expand our product offering for the Local Payments proposition, we implemented 'Bitpay' as the first supported cryptocurrency.

Bitpay enables merchants to make payments using their cryptocurrency wallets on the browser or mobile device and converts Bitcoin, Bitcoin Cash or Ethereum into central-bank currencies. Consumers simply scan a QR code during the checkout process.

×	APM	
	aliPay	<input checked="" type="checkbox"/>
	bancoDoBrasil	<input type="checkbox"/>
	bancolombia	<input type="checkbox"/>
	bancontact	<input type="checkbox"/>
	bankTransfer	<input checked="" type="checkbox"/>
	bitpay	<input checked="" type="checkbox"/>
	boleto	<input checked="" type="checkbox"/>
	bradesco	<input type="checkbox"/>

Gateway's Merchant Care Suite (MCS) service 'APM' has been enhanced with new checkbox 'bitpay'.

Although the Gateway's coding has been finalized, other impacted areas have yet to complete changes, which is required prior to any merchant can go live with this new payment option.

## ‘combinedpage’ as default checkout option

For our merchants who would prefer to utilize checkout option ‘combinedpage’ by default without a need to adjust their integration, we introduced a new configuration item “*checkoutOptionCombinedPage*” in the Gateway’s Merchant Care Suite (MCS).

✖	Connect (Hosted Payment Page)	<div>allowExtendedHashCalculationWithoutCardDetails</div> <div>allowMOTO</div> <div>allowMaestroWithout3DS</div> <div>allowVoid</div> <div>cardCodeBehaviour</div> <div>checkoutOptionCombinedPage</div> <div>hideCardBrandLogoInCombinedPage</div>	<div><input type="checkbox"/></div> <div><input checked="" type="checkbox"/></div> <div><input checked="" type="checkbox"/></div> <div><input checked="" type="checkbox"/></div> <div>mandatory ▾</div> <div><input checked="" type="checkbox"/></div> <div><input type="checkbox"/></div>

Once the new checkbox is setup to ‘true’ and in the merchant’s Hosted Payment Pages (HPP) transaction request the ‘checkoutoption’ parameter is not sent, then HPP ‘combinedpage’ checkout option is displayed to the cardholder during the payment process automatically.

# Credit Limits

In order to allow our merchants to setup and change limits for transaction type = CREDIT, we have implemented a new tab 'Credit Limits' in Gateway's Merchant Care Suite (MCS) and MCS API Webservice.

The operations team can easily configure individual limits for all supported currencies directly in the merchant's account.

The service has been activated for our merchants in Middle East, but can be enabled for any distribution channel upon request.

# New Payment Method: PayIt

For one of our major clients in the Middle East, we implemented a new local payment method **PayIt**.

Payit is the first all-in-one digital wallet in the region\*. It helps the consumers to manage their digital cash on the go, exchanging money, paying online or sending/receiving money to/from their friends.

PayIt is available to our merchants in the United Arab Emirates integrated via Hosted Payment Pages checkout option 'combinedpage'

In the Gateway's Merchant Care Suite (MCS) the service 'Alternative Payment Types – Next Generation' has been enhanced with new check box and data entry fields to reflect enrollment information necessary for the setup on the Gateway.

## Work in progress: CIT & MIT Indicators

Mastercard is introducing a new indicator to specify the type of cardholder-initiated transaction (CIT) or merchant-initiated transaction (MIT) which convey to the issuer, that the merchant and the cardholder have an established relationship and an agreement to use stored payment credentials as part of the transaction process.

Gateway's changes to support this mandate include the new REST & SOAP API request parameters.

Further technical improvements and authorization protocol implementation will be delivered in the next Gateway releases.

Indicator Subcategory	CIT	MIT
01	Credential-on-file	Unscheduled Credential on File
02	Standing Order (variable amount and fixed frequency)	Standing Order (variable amount and fixed frequency)
03	Subscription (fixed amount and frequency)	Subscription (fixed amount and frequency)
04	Installment	Installment
05		Partial Shipment
06		Related/Delayed Charge
07		No Show Charge
08		Resubmission

# Minor improvements and fixes

# Minor improvements and fixes (1)

## GENERAL

- Support for 8-digits BIN in the DCC call – **Hosted Payment Pages, Virtual Terminal**
- JCB & Diners MID added in 3-D Secure service – **Merchant Care Suite**
- EMV 3DS TermURL and 3DSMethod notification URL length extended – **REST API, SOAP API**
- Support for PoP Code for OCT – **REST API**
- National Id removed from Trustly transaction request – **Local Payments**
- New timeout for SEPA DD Model A – **Local Payments**
- Address fields mapping for SEPA DD non EU IBANs – **Hosted Payment Pages**
- Adding panMode in FS3DS request objects – **3DS Server**
- Error message fix for Header/Footer Text exceeding 4000 chars – **Virtual Terminal**
- Error message fix for processed PaymentURL resubmission – **Hosted Payment Pages**

# Minor improvements and fixes (2)

## EMEA

- New 3DS Acquirer setup – **Germany, GMA**
- Support for partial approval – **APACS MAS, ZVT**
- Changes in settlement file for CP Preauth/PostAuth – **AIBMS APACS, MSIP, Omnipay**
- Support for Source of Funds for Visa OCT – **AIBMS APACS**
- OpenFX enabled as DCC provider – **Germany**
- ECI added to the Moby report – **Middle East, Italy**

## APAC

- Support for tip amount – **HISO India Auth**
- Fix for sending token cryptogram for Rupay auth message - **IMS**

## LATAM

- New 3DS Acquirer setup – **Mexico**
- PFAC service enablement – **Mexico**
- MaxDaysToReturn extended to 360 days – **Brazil**

## North America

- Service config 'allowIncrementalPreauth' enabled – **all US resellers**
