

NEXO Acquirer Protocol Response Codes

Structure and Content Response Codes are specifically defined for Fiserv's NEXO Acquirer Protocol. These codes are used in all response messages, in advice messages and in reversal messages. Each code indicates a specific result, status or action.

The following table lists all Response Codes currently supported with the meaning of each code.

Code	Description / Action / Meaning	Retry of cancellation possible
1000001	Referenced original transaction not found.	1
1000002	The transaction does not contain a reference to the original transaction.	1
1000003	Referenced transaction is already voided.	1
1000004	Reconciliation request does not contain any totals.	
1000005	Reconciliation ID in request missing.	
1000005	Reconciliation ID in request missing.	
1000006	Order not found in database.	2
1000007	Currency conversion ID not found.	
1000008	Voiding of returned transactions is not supported.	
1000010	transaction.capture/type in this combination not supported in an authorisation request.	
1000011	transaction.capture/type/reversal/success in this combination not supported in an advice request.	
1000012	This type of message is not supported.	
1000013	Impossible to void transaction (settled credit transaction).	
1000014	Impossible to void transaction (amount does not match).	
1000015	PreAuth is marked as incremental, but no transaction reference is given	
1000016	Store not found	
1000017	Merchant not found	
1000018	Terminal not found	
1000019	Store not configured for DCC.	
1000020	Access denied	
1000021	Invalid attestation status.	
1000022	Missing notification parameter.	
1000023	Incorrect store configuration	
1000024	No active terminal found	
1000025	Configuration problem.	
1000090	Invalid MAC	
1000100	HTTP request does not contain application/xml charset=UTF-8.	
1000101	Unknown type of message.	
1000102	Failed to parse header.	
1000103	Failed to parse body part of message.	
1000104	Failed to parse security trailer of message.	
1000105	Failed to parse xml document.	

1000106	Failed to create XML for response.	
1000107	Failed to process message.	
1000108	Duplicate messages are only allowed for advices.	
1000109	Failed to translate PIN block into ISO_1 format (only in test).	
1000110	The retry message was received too early. IPG is still working on the original message.	Yes
1000111	Failed to parse XML request message.	
1000112	Verification of XML message against XSD found errors.	
1000113	XML External Entity Injection identified.	
1000114	Invalid merchant category code.	
1000115	Invalid currency conversion ID.	
1000116	Invalid currency code.	
1000117	Invalid exchange rate.	
1000118	Invalid original amount.	
1000119	Problems while validating MAC.	
1000120	Problems while creating MAC.	
1000121	Problems while decrypting card data.	
1000122	Problems while decrypting CVD/CVV/CVC data.	
1000123	Invalid card expiration date	
1000124	Failed to extract mac relevant part of message.	
1000125	Invalid card sequence number.	
1000126	Invalid amount.	
1000127	Invalid EPP selection.	
1000128	Invalid combination of AttndncCntxt and UattndddLvlCtgy.	
1000129	Failed to initialize terminal.	
1000200	Card validation request must have zero amount.	
1000201	Issuer BIN does not match PAN.	
1000202	No issuer BIN available	
1000203	Incorrect token value	
1000204	Incorrect (nonnumeric) value in currencyConversionId.	
1000205	Missing PAN.	
1000206	Incorrect IPG transaction ID.	
1000207	Payment type not supported.	
1000208	No merchant.	
1000209	No terminal.	
1000210	Incorrect data.	
1000211	Missing data.	
1000212	Incorrect login.	
1001000	Incorrect EMV data in response.	
1001001	Incorrect EMV data.	
1005000	Old advice received, but we have already answered a newer retransmission request.	
1009000	Unexpected duplicate message (not an advice).	
1009001	Failed to build header.	
1009002	Failed to validate XML message.	
1009003	Incorrect message mapping.	

1009004	Internal error	
1009005	Setup in IPG is incorrect	
1009006	DB problem.	
1009007	No response from core	
1009008	TxRef/TxDtTm has been already used by a different transaction invocation.	
1009009	Internal error.	

1= no, nothing to cancel or transaction already canceled
2= no, but refund can be tried
